REASON FOR ALLOWANCE

1. Claims 1-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is for at least the reason of the inclusion of a third ferromagnetic layer sandwiched between the first and the second ferromagnetic layers in order to determine a direction of a spin polarized electron when an electric current is applied in order to reduce a reversal effect as disclosed with all the limitations in claims 1, 13, 18 and 21. Claims 2-12, 14-17, 19-20 and 22-23 further include the limitations of an electric resistance between the first and the second ferromagnetic layers, a structure of the third ferromagnetic layer and a probe to access the magnetic cell.
